

NTERPRISE

R&D PROJECTS FUNDING TOKENIZATION

STATEMENT OF PURPOSE

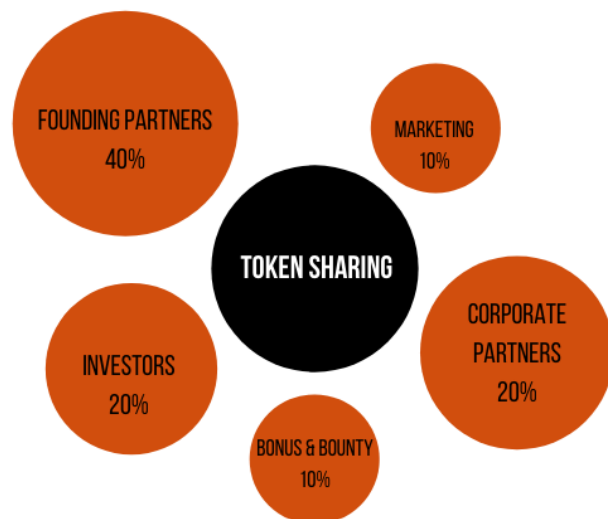

Fundraising and crowdfunding is a key challenge of R&D projects and initiatives assets allocation. Centralized procedures don't allow the industrial and academia project managers and proposers to raise their required funds in scaling up stage once a plan is initiated. In order to fix some challenges and key issues on R&D projects fundraising and crowdfunding, NTerprise is launched to provide a solution according to decentralization capabilities and blockchain technology maturity.

- R&D projects assets evaluation and required funds for fundraising stages
- Assets and fund tokenization using smart contract of Ethereum main network
- Tokenized R&D fund and assets sorting to plan the projects investment and fundraising features

SPECIFIC OBJECTIVES

- Provide a secure and decentralized fundraising and promote the R&D projects' allocated assets tokenization opportunities
- Make a peer to peer network of project managers, investment parties and institutional partners to achieve the goals of R&D projects financing
- Extend the trade opportunities for R&D projects stakeholders by initiating a decentralized finance (DeFi) product

10B

Minted tokens available to trade and pair in funding tokenization portfolio

1:300

Fixed pairing ratio with Ethereum to affirm the transactions swapping and exchange

200

Maximum portfolio pitches to use the decentralized fundraising tokenization features
